

No Idling? No Problem.

Kohler Power Systems brings truckers a better way to keep their comforts in the face of rising fuel costs. Introducing the KOHLER® diesel auxiliary power unit (APU), one of the most economical and compact APUs on the road. The air-cooled, self-contained unit is installed with no intrusion into the truck's critical systems. The KOHLER APU supplies DC power to charge the truck's battery and provides complete heating and cooling for the cab, while minimizing fuel consumption. So drivers keep their comforts while saving on fuel, engine wear and maintenance.

**From independent owners to fleet operators,
a KOHLER APU sees to it you sacrifice nothing.**

KOHLER®

The KOHLER® APU Makes Anti-Idling a Nonissue

KOHLER 3APU-24V FEATURES

- **Light and compact** – This frame rail mounted power unit weighs less than 109 kg and measures a compact 288 mm x 710 mm x 600 mm H. The power unit can be mounted on the truck's frame rail two different ways using the same mounting brackets based on driver's preference.
- **Powerful engine performance** – Powered by an air-cooled, 4.7 horsepower engine; single-cylinder, 2400 rpm, 349 cc displacement.
- **Simplified maintenance, solid performance** – The air-cooled unit uses a belt-driven alternator, which does not require intrusion into the truck's system when installed. When synthetic oil is used rather than mineral oil, the KOHLER 3APU-24V requires an oil change only every 500 hours.
- **Warranty** – Limited two-year.
- **Battery charging** – The power unit provides 25 amps to keep the truck's 24-volt battery charged at all times.
- **Space saving** – The entire 3APU-24V unit does not take up any vital under-bunk storage space. Power unit and condenser are mounted outside of the cabin, and the evaporator is mounted on the wall inside, leaving vital storage space free.
- **Quiet operation** – A custom sound-attenuated enclosure allows the KOHLER 3APU-24V to operate at <64 dBA at full load.
- **Control** – Complete in-cab start/stop and heating/cooling adjustments.
- **CE-Certified**

The **KOHLER 3APU-24V** comes equipped with separate space-saving evaporator and condenser components. It provides an air-conditioning capacity of 12,000 BTU/hour and 10,000 BTU/hour of heating, independent of the truck's climate control system.

Evaporator: Unique design provides four airflow cups to distribute the air evenly throughout the cabin.

Condenser: Space-saving design allows condenser to be mounted outside of cab, keeping vital under-bunk storage space free.
