

## WE PROTECT AMERICA'S POWER.

For more than 50 years, Kohler has provided backup power to every branch of federal, state and local governments. We understand your specialized backup power requirements. That's why we provide you with dedicated account managers who live and breathe government operations, both CONUS and OCONUS.

Our commitment to you is twofold. We'll provide reliable, state-of-the-art equipment, and we'll make the entire process easy — from first quote to approved installation.

### WHY KOHLER POWER

#### THE SMART CHOICE FOR GOVERNMENT AGENCIES

At Kohler Power, we don't do one size fits all. We help create custom solutions for you and your agency. But the care doesn't end there. We'll be by your side every step of the way to make sure the job's done right.

#### VALUE ENGINEERING

KOHLER® power products are 100% compatible and designed to work seamlessly together, ensuring complete system reliability.

Our products are prototype and production-tested to ensure maximum performance and quality.

#### All of our products meet the following codes and standards:

EPA Emission Certification  
IBC Seismic Certification  
NFPA 110  
UL 2200  
California OSHPD

#### TRUSTED CUSTOMER SERVICE

Dedicated government account managers  
Government contract vehicles  
Rapid quote delivery  
Superior service and support across CONUS and OCONUS

#### TECHNICAL EXPERTISE

Fully customizable offerings  
Complete power system solutions  
– standby, continuous and prime power applications  
Easy-to-use, highly programmable controls  
State-of-the-art technologies  
Remote and local enterprise monitoring and control  
Program management, logistics and installations/start-ups

#### FEDERAL GOVERNMENT EXPERIENCE

The following agencies have trusted Kohler Power Systems:

- USDA
- DOC/NOAA
- Defense
- DHS
- Energy
- HUD
- Interior
- State
- Treasury
- DOT/FAA
- VA
- EPA
- NASA
- USPS
- TVA

## SUCCESS STORY

The Federal Aviation Administration's (FAA) standby power contract, supporting the National Airspace System's (NAS) critical applications, was awarded to Kohler Power in 1995 and has been re-awarded to Kohler every contract period since then.

As a result, Kohler Power has supplied hundreds of mobile and fixed generator sets, transfer switches and switchgear to major support centers and critical facilities. Kohler also provides technical service and systems training, logistical staging and aftermarket parts support 24/7, 365 days a year.

GSA 56 Contract: GS-07F-019DA  
DUNS: 12-158-7513

Cage Code: 67271

## CUSTOM POWER FOR GOVERNMENT APPLICATIONS

### STATIONARY POWER

#### KOHLER® Generator Sets (SIN 383-2)

- Natural gas/LP-fueled models to 400 kW
- Diesel-fueled models to 3250 kW
- Exceptional motor starting and voltage recovery
- Configurable to a variety of system needs

### MOBILE POWER

#### Mobile KOHLER Generators (SIN 383-2)

- Diesel-fueled models 20 to 500 kW
- Integral fuel tanks with containment
- Voltage selector switch for multiple voltage options
- Simple, easy-to-use controls
- NEW LP-powered mobile generators 20 to 500kW

### MARINE POWER

- 4 to 500 kW gen sets (SIN 383-2)
- 50/60 Hz frequency adjustable
- CARB & EPA emission-compliant

### PORTABLE POWER (SIN 383-2)

- Gasoline-fueled models from 2.0 to 12.3 kW

### MAIN SWITCHING OPERATIONS

#### Automatic Transfer Switches (SIN 383-2)

- 30–4000 amps, in standard-, programmed- and closed-transition configurations
- Integrated communication interface using Ethernet or LAN
- Service entrance, non-automatic, automatic and bypass configurations

#### Paralleling Switchgear (SIN 412-17)

- Customizable to any specifications and facility needs
- Compatible with all gas and diesel gen sets
- Small footprint, reliable and cost-effective

#### KOHLER Decision-Maker® Controller (SIN 383-2)

- Designed for generators 5 to 3250 kW
- Programmable to meet all applications
- Features network and remote communication
